
Retaining Wall Works Adjacent the Elmore Stoutt High School to Begin June 30

Release Date: 27 June, 2025

The public is notified of the construction of a retaining wall structure in the ghut adjacent to the Elmore Stoutt High School. The construction of the 165 linear feet of retaining wall structure is to mitigate against the flooding of the school's compound.

Works are expected to commence on Monday, June 30 and are anticipated to last for a period of two (2) months. Motorists are advised that there may be heavy equipment exiting from the school premises on a periodic basis.

Any inconvenience caused is regretted.
