Shelter Classifications

Primary shelters can provide refuge during and after a hazard like a storm or earthquake and are equipped with generators as well as facilities for shelterees to cook and bathe.

Secondary shelters can provide refuge during and after a hazard but don't have as many of the facilities as a primary shelter and would house shelterees for a shorter period of time.

Tertiary shelters can provide refuge after a hazard and would only host shelterees temporarily.

These facilities have been inspected by the Department of Disaster Management and the Environmental Health Division in keeping with the BVI Emergency Shelter Manual.
